

SSP SELECT INSURANCE

WHAT IS SSP SELECT INSURANCE?

SSP Select Insurance has been designed to provide the core platform for digital insurance innovation. Its engagement centre interface provides staff with a single easy to use portal across core components including: Select Contact, Select Policy, Select Finance, Select Reinsurance, Select Claims, Select Composer – enabling rapid development and the launch of new products into the market on a low-cost, high business-benefit basis. Flexible, seamlessly integrated, channel-neutral, on-demand and comprehensive; it is architected to enterprise level, is multi-language, multi-currency, multi-tax and region, and supports personal and commercial lines products.

WHY CHOOSE SSP SELECT INSURANCE?

SSP Select Insurance is our cutting-edge insurance IT solution that puts you in control of building the operating model that will future-proof your business. Whether you take a hands-on approach to configuring your IT package, or you're part of a large company with particularly niche needs, SSP Select Insurance is a flexible, modular, end-to-end software package. Pre-built to cover all aspects of your required functionality, it is a web-enabled solution which helps you address your business priorities by enhancing or replacing your legacy systems with minimum impact on your business.

- **Driving Profitable Growth:** Ever-changing customer demands, regulatory pressures and a challenging economy can make profitable growth difficult. A sustainable solution is vital to meet the sophisticated, niche requirements of each insurance company.
- **Connecting with your market:** Increasing connectivity between businesses, trading partners and customers present numerous challenges and opportunities to today's insurers. A system which enables immediate access and on-demand service for brokers and customers with minimum disruption is key to staying ahead of your competitors.
- **Streamlining your operations:** Finding a core Administration System which allows you to drive profitable growth, while enhancing your business processes is paramount to ensuring your challenges are being met head on. With over 30 years of industry knowledge behind us, you can trust SSP to provide a tailored solution which meets your complex requirements.
- **Proven across the globe:** SSP Select Insurance has been implemented across the globe on three continents by both commercial and personal lines insurers, distributing direct to the consumer, via affinity channels and via brokers.

HOW IT WORKS - CORE FEATURES

SSP Select Insurance uses the latest open-architecture technology, built to Insurance Application Architecture (IAA) standards and frameworks in collaboration with IBM, designed to integrate easily into any distribution channel and business process. It also gives you a number of options for legacy replacement, from full 'rip-and-replace' to an 'enhance-and-evolve' option. At the same time as being flexible, SSP Select Insurance is secure, accessible 24/7, constantly updated and helps speed the adoption of a Service-Orientated Architecture (SOA) enterprise. In short, it helps you stay ahead of the curve and respond to the changing demands of your market, today and tomorrow.

Core Features	What it does
SELECT CONTACT	Bringing simplicity, flexibility and order to customer relationship management, anywhere in the world. Our intelligent component gives you a single view of customers and relationships across your business, channels and trading partners. It maximises up-sell and cross-sell opportunities, enables multiple communication and co-ordination routes, and provides more effective insight and customer service.
SELECT COMPOSER	Fast, intuitive and business-friendly: Select Composer is a product composition tool that seamlessly integrates with your current or new processes. It enhances productivity by giving business users complete control of the product definition process, eliminating any coding requirements. It has the agility to cater for any product structure, the responsiveness to cost-effectively meet changing needs and a speed to market greater than that predicted by experts – including Microsoft itself.
SELECT POLICY	Flexible, seamlessly integrated, channel-neutral, on-demand and comprehensive: an intuitive, browser-based interface masks a feature-packed component offering every function for controlling policies. Streamlines processes for efficiencies in administration and underwriting and is secure and accessible 24/7.
SELECT FINANCE	Cost-effective automation, multi-currency capability, configurable commission and charging, alongside full insurance accounting. For any aspect of finance, SSP has you covered. From automated receipt and policy reconciliation to flexible payment, secure authorisation and audit to a full payment history, query handling and FCA reporting, you'll always have access to what's important – the numbers.
SELECT CLAIMS	The Select Claims component drives down costs, boosts quality, manages third-party relationships and simplifies the whole process through a choice of interfaces. Even more importantly, by tracking all claim activities through business process management and service targets, it supports best practice from FNOL to closure.
SELECT REINSURANCE	Select Reinsurance simplifies the complex administration of reinsurance. Extensive functionality, designed around the way you work, gives you complete control of all reinsurance classes, programmes, worksheets, and faculty and treaty arrangements.
